- Web development 2022 Coderhouse
- Javascript 2022 Coderhouse
- React.js 2022 Coderhouse
- Ux/Ui design 2023 Coderhouse

IT EXPERIENCE

March 2023 – June 2023

Software developer at Panacea Fintech.
Under a 3 months contract, I dedicated myself to fixing errors on the front and back of their official web site. They also commissioned me to make a paper wallet web generating QR codes returning a private key and a public address.

May 2023

Freelance project for Avatar World Group (AWG).
Landing page sectioned into 4 parts, contained a form connected to emailJS.

July 2023

Freelance project payment gateway for a veterinary.
I was commissioned to make a table of values with pet health plans, followed by a payment gateway where the user must complete all the required boxes with their personal data, followed by the data of their pet(s).

October 2023

Website for Magna Dimenseon (landing page)
They requested that I design and create a presentation website filled with animations. I also digitally illustrated both representatives of this startup.

November 2023

Website for IQ Broker (Landing page).
I converted a WordPress website to React, fixing errors, adhering to the color palette, and adding a contact form. I managed the overall design.
